Ms. Linda F. Munson
Evergreen Innovations, Inc.
2323 Snohomish
Richland, WA 99352

Dear Ms. Munson:

On February 15, 1993, you and Mr. David Eaton, of EG&G Idaho, submitted to this office "Draft Inspection Report Enewetak Field Station," dated February 15, 1993. The draft inspection report summarized the findings of your evaluation at the Enewetak Field Station. This Office has reviewed the document and is returning the draft inspection report with our comments. For your convenience, a diskette containing the draft report with our comments (Wordperfect 5.1, file name "ENEWET.INS") is also included. Our comments are generally editorial in nature and are directed toward making the report more concise. We do not believe that we have changed any of your findings or conclusions. After your review, please resubmit your final evaluation report to this office.

You will note that our comments on the final report include removing all the attachments and appendixes with the exception of Figures 1 and 2, and Tables 1 and 2. We would like you to provide this office, under separate cover, a second supplemental document containing the supporting information and color photographs, which are currently contained in Appendix 1 and 2 of the draft inspection report.

I would like to thank you for the professional and thorough work that you and Mr. Eaton performed for us, and look forward to the opportunity to work with you in the future. Thank you for your cooperation.

Sincerely,

A handwritten signature in cursive script that reads "C. Rick Jones".

C. Rick Jones
Director
Office of Health Physics
and Industrial Hygiene
